Subject: Whitmoyer Laboratories Site
Bottled Water Supply
Families in Myerstown Borough, Lebanon County
BCM Project No. 00-6207-01

Dear Mr. Steuteville:

Per the EPA Order of September 28, 1990, item 8.3, d, our client will soon be accepting responsibility for supply of bottled water and carbon filters to various families in the Myerstown area. On behalf of the Private Study Group, I am in the process of arranging for this service. We intend to continue using the present supplier, but I need your help to resolve conflicting information before I can comply with the Order.

I received on November 8, from Blue Mountain Spring Water Company of Harrisburg a handwritten list of 19 names and 20 addresses - John Layser as receiving at both 433 and 553 Race Street - where bottled water is provided on a Bi-monthly basis, and 3 names and addresses where filters are changed Bi-annually. They have been billing OH Materials for these services, based only on a verbal agreement.

Our client derived from OH Materials information dated April 10, 1990 three separate tables, which were copied to you with cover letter on October 11, 1990. None of these list the Layser #553 Race Street address. Table I does, however, indicate deliveries to both Jacob Mays Jr. and Jacob Mays Sr., at 221 Mill Street.

I am enclosing for your further information, copies of the referenced list and tables, and my recent compilation of them both.

Page 2

Please review this information and advise as soon as possible if our client will be responsible for temporarily supplying bottled water to 19, 20 or 21 families.

By copy of this letter, I will also try to get answers from others while I wait for your call.

Very truly yours,

Dear Bill:

As a follow-up to our discussions beginning on October 3 and continuing over the past week to develop a list of names of Myerstown residents involved in the hookup to the water line extension and a list of the "gray area" homes, I am sending you a copy of the lists as they now stand.

Table I contains the list of residential and business hookups as were detailed in the latest set of plans for Alternate II developed by OH Materials and dated April 10, 1990. Table II contains the list of the "gray area" homes which are currently receiving bottled water but were not slated for water line hookup. Table III contains three homes requiring further clarification by EPA.

Since we were in basic agreement on the list in Table I at our meeting yesterday, we sent a letter to each of the names on the list alerting them to what is happening with the water line installation. A copy of this letter is attached for your records.

We look forward to receiving the latest plans, bid specifications, and other pertinent project information which you said would be available from OH Materials on Friday, October 12. I will arrange for messenger pickup of this material from your office. This will be a big help to our consultant and should make this project move forward more quickly. We are in the process of interviewing consulting engineering firms and will keep you informed of our progress.

If you have any questions about the enclosed information, please give me a call at 592-2330.

Sincerely,

(b) (4)

Dear <Salutation>:

As part of an agreement with the U.S. Environmental Protection Agency, the Whitmoyer Laboratories Private Study Group (WLPSG), composed of Rohm and Haas Company and SmithKline Beecham, Corp., has agreed to install a water line to serve homes impacted by groundwater contamination from the Whitmoyer Site. Records we have been provided by EPA indicate that your home is included in that group.

You may recall that we made an offer to install water lines at EPA's August 1st public meeting in Township Hall and proposed a plan to address all contaminated areas on the site. Although our offer to clean up the site has not been accepted, we plan to proceed with water line installation immediately.

We will meet with you and your neighbors in the next few weeks to discuss our plans in detail and to answer any questions you may have about the project. We hope to be able to complete this project as quickly as possible and with the minimum of inconvenience. Until the new system is in place, you will continue receiving bottled water.

If you have any questions regarding the new water line or WLPSG, please feel free to call me at (215) 592-3248.

Sincerely,

(b) (4)
for the Whitmoyer Laboratories
Private Study Group
